

BLUE ZONE SPACES

First Floor Remodel and New Custom Stairs

#TheBelle

An elegant hosting and gathering space for loved ones is at the center of this entire project. Our clients wanted to create spaces where their guests and family felt inspired and comfortable to participate in making a meal, grabbing a drink, and cozying up by the fire.

The pantry design is sure to draw everyone in... an otherwise "utility" space turned moody feature. This pantry, made by our custom metal artisan spills in tons of natural light, creating a beautiful display for our client's bourbon collection and other hosting essentials. This entire first floor renovation included a reworked floorplan, new custom-designed kitchen, BZS custom cabinetry, new stairs with glass and metal work, floor to ceiling concrete fireplace, updated powder room and moody wet bar along with all new hardwood floors. An entertainer's dream!
